GT40 Rims

The GT-40 family was developed in 1989 as a one piece cast aluminum wheel for Cobra replica bolt on applications. Since they are specifically friendly to five on bolt circles, hence the deletion of a sixth original spoke and re-sculpturing to five. Generally, there is only one thing in mind about this wheel and that is richness of period. All open window features and spoke shapes were carefully studied and rendered with all the softness as original. The machined contours are so close to Cobra that the same tracer templates are used when genuine wheels are restored! Tri-wing knock offs come polished and are correct in shape as is the center dust cover machined surface. Custom sizes available. These rims are shipped UPS Ground "Insured" and are on a "Made to Order" basis with an approximate 2 week delivery time by PS Engineering. Please note: The 1967-68 Mustangs will accept the 17x9" wheel for the "Rear" if you are looking to run a larger tire! Tire selection: We recommend a tire size of 245x40x17 for the 8" wide rims and a 275x40x17 for the 9" rims for fitting just about all years of early model Mustangs. On 1965-66 model cars, you can go up to a 17x8" rim all the way around with a 225 in the front, 245 in the rear. It's not suggested to run the 17x9 on the rear of the 1965-66 Mustangs unless you are modifying the wheel wells and using a pan hard rod! The wheel centers are textured metallic and may appear with slight yellow tint depending on light source...

Please Note: We are not responsible for wheel backspacing and fitment. There are many modifications that can change the fitment of rims including brake conversions, different rear ends, Mustang II conversions, tire selection, etc. Please use these [wheel charts](#) to see what combinations other people have tried. Once tires are mounted on the rims, it deems them unreturnable. If there are scratches where the lug nuts contact the rim, it also deems them unreturnable. You can check fitment without mounting the tires and without bolting them on the car. If you decide not to keep rims purchased from Mustang Depot within 30 days of receipt, and they are in the same unused, unmounted condition as received, and the original packaging present, the normal [return policy](#) will apply.
